Mechanical Assembler

DESCRIPTION:

Team member of production team including assembly for new products and repair/troubleshoot of rebuild jobs. This is a fast-paced environment that may involve working on a variety of tasks each day. There may be a possibility of field service work and/or assisting customers via telephone with troubleshooting their equipment. This is NOT a production/assembly line environment. Due to our large catalog of products and services, individual must be willing to cross-train within the shop.

REQUIREMENTS:

Must be able to lift 50 pounds.
Must provide own basic electrical and mechanical tools and personal toolbox.
Must be a self-starter who can perform assigned tasks with minimal supervision.
Must have good communication skills both written and verbal.
The ability to work well with others in a team environment is required.

USEFUL SKILLS:

Ability to read and interpret blueprints, technical drawings and wiring schematics
Use of precision gauges and measuring tools
Experience with grinders, lathes, milling machines
A general knowledge of machine tool types, their function, and typical machining process is a plus.
The successful candidate will be organized, self-starting and capable of working independently.
Reliability, a strong work ethic and problem solving are essential.
Run rotary surface grinder, coil winder, lathe, Bridgeport mill, and other machines in machine shop.
Building, fabricating, and modifying precision tooling as required for each job.

Maintaining cleanliness and organization of work area
Calculate raw material requirements for production
Work with management and engineering departments to ensure production deadlines are met.

Experience in the following areas is a plus

- assembly
- metal fabrication
- machinery rebuilds
- magnetics/electromagnetics
